PROFESSIONAL SUMMARY

Full Stack developer with hands-on experience of designing, developing, deploying and maintaining web as well as mobile application. Possesses diverse experience of creating multiple highly scalable applications using different tech stacks. Adept at understanding the requirements of the business and delivering projects accordingly. Highly skilled at collaborating with team members to ship products within deadlines. Looking forward to applying the acquired gamut of skills in a challenging role.

WORK HISTORY

Power TakeOff - Software Developer

Kitchener, ON • 11/2020 - Current

- Developed full-stack web applications which processed, analyzed, and rendered data visually.
- Liaised with back end developers, front end developers, quality assurance testers, and CTO as needed.
- Managed time-sensitive updates, including content changes and database upgrades.
- Planned, wrote, and debugged web applications and software with complete accuracy.

Value Connect Inc - Full Stack Developer and Freelancer

Guelph, ON • 09/2019 - 09/2021

- Contributed ideas and suggestions in team meetings which helped the team to improve and achieve the goals. The ideas strengthened developmental methodologies making development, planning and release seamless following best industry practices.
- Collaborated on all stages of systems development lifecycle, from requirements gathering to production releases and also reviewing code.
- Created a hybrid mobile app using react native which helped appraisers on our platform to easily inspect properties. This app made report building a lot easier.
- Built, tested and deployed scalable, highly available and modular software app.
- Collaborated with developers and performance engineers to enhance supportability and identify performance bottlenecks. Reduced the dashboard load time by 40 percent.
- Managed milestones from initial steps to final delivery which includes roadmap planning, daily standups and retrospective.
- Collaborated with integration partner teams and managed integration services seamlessly. Which led to an increase in orders by 15 percent.
- Wrote scripts to automate the process of deployment.

Silent Infotech - Programmer Analyst and Freelancer

09/2016 - 08/2019

- Coordinated with partners to finalize designs and confirm requirements.
- Recommended architectural improvements, design solutions and integration solutions.
- Developed work-flow charts and diagrams to ensure production team compliance with client deadlines.
- Performed work according to project schedules and high quality standards.
- Evaluated project requirements and specifications and developed software applications that surpassed client expectations.
- Created, delivered and maintained scalable system architecture to support high-availability websites with various internal applications.
- Prepared test plans and test cases based on requirement documents .

- Deployed the developed service or code on cloud and on premise servers.

Axis Ray - Software Developer Intern 01/2016 - 07/2016

- Worked on 4-site E-compiling solution. The idea behind the product was to provide version control and web based IDE.
